

## **Covid19 Prediction**

- Website is designed using HTML, CSS and Java Script.
- There is a drop zone on the website homepage which accepts X-ray images.
- When clicked on the 'Check' button, a pre-trained VGG16 model predicts whether the person has covid19 or not.
- Functions written in the backend generates the charts and tells the user how likely he is prone to Covid19.
- AI(here deep learning model VGG16) is used in the backend.
